

Nafees Shaikh

Data Analyst | Data Visualization Specialist | Fresh Graduate | Entry-Level

nafisshaikh114@gmail.com | +91 9975584833 | Mumbai | github.com/datascience619 | [linkedin.com/in/nafees-shaikh-441405251/](https://www.linkedin.com/in/nafees-shaikh-441405251/) | <https://datascience619.github.io/Nafeesio/>

SUMMARY

Motivated Data Science graduate with strong foundation in data analytics, visualization, and business intelligence. Proficient in Python, SQL, Power BI, and Tableau with hands-on experience in developing interactive dashboards, machine learning models, and data-driven solutions. Completed enterprise-level job simulations with TATA and Quantum, Deloitte, current insights demonstrating analytical skills and eagerness to contribute to data-driven business decisions.

EDUCATION

Bachelor of Science in Data Science

Reena Mehta College, Mumbai University | 2022 – 2025

Higher Secondary Certificate (Science)

New Era Junior College, Bhiwandi | 2020 – 2022 Secondary

School Certificate (SSC)

Rafiuddin Fakhi Boys High School, Bhiwandi — 2019–2020

SKILLS

Programming Languages: Python, SQL

Data Visualization Tools: Tableau, Power BI, Excel

Data Analysis: Excel, Statistical Analysis, Data Cleaning, Data Modeling

Business Intelligence: Dashboard Development, Data Storytelling, KPI Development

Soft Skills: Problem Solving, Adaptability, Critical Thinking

RELEVANT EXPERIENCE & VIRTUAL SIMULATIONS

Data Analytics Job Simulation

Deloitte Australia via Forage | **June 2025**

Completed a forensic data analytics simulation, analyzing financial records and performing Excel-based data classification.

Developed an interactive Tableau dashboard to identify patterns and draw business conclusions.

Applied investigative techniques to detect anomalies and deliver actionable insights to stakeholders.

Data Analytics & Commercial Insights Simulation

Quantum via Forage | **May 2025**

Analyzed customer transaction datasets to extract key commercial insights and inform strategic planning.

Conducted uplift testing using benchmark store data to evaluate trial store performance.

Delivered a detailed report to the Category Manager with recommendations for data-driven decision-making.

Data Visualization Simulation – Empowering Business with Insights

Tata Consultancy Services via Forage | **May 2025**

Designed compelling data visualizations to support strategic decisions by senior leadership.

Formulated key discussion points based on trends and presented visual narratives for business meetings.

Communicated complex insights through executive-level dashboards using Power BI and Tableau.

PROJECTS

1. Smart Inventory Management System

Technologies: Python, Tkinter, SQLite, Scikit-learn

- Built a desktop app for stock tracking, sales processing, and reorder alerts using a custom SQLite database.
- Implemented linear regression for demand forecasting and automated reorder when stock fell below threshold.

- Integrated email notifications for low-stock alerts and generated sales reports with revenue summaries.

2. COVID-19 Global Tracker Dashboard

Technologies: Tableau | Duration: 1 month

- Engineered comprehensive data visualization dashboard monitoring pandemic trends across 195+ countries
- Implemented advanced filtering and drill-down capabilities for date ranges, regions, and comparative analysis
- Created dynamic KPIs, trend analysis, and forecasting models with 99.9% data accuracy
- Integrated real-time data feeds and automated refresh mechanisms for current insights. Data Cleaning & Transformation (Excel & SQL) Link.

3. Netflix Content Intelligence Dashboard

Technologies: Tableau | Duration: 2 months

- Developed interactive business intelligence solution analyzing 8,000+ content library entries
- Designed advanced visualizations including heat maps, geographic analysis, and temporal trend comparisons
- Created content distribution analysis by genre, country, release patterns, and performance metrics
- Implemented user-friendly interface with dynamic filtering for stakeholder self-service analytics.

4. Text Summarization & Translation Tool

Technologies: Python, Tkinter, NLP, (Sumy), Google Translate API, gTTS

- Built a GUI tool to summarize, translate, and convert text/audio from PDF, DOCX, and TXT files.
- Integrated multiple NLP summarization algorithms (LexRank, LSA, Luhn, KL) with multi-language support.
- Enabled text-to-speech playback, audio stop control, and summarization history with timestamp logs.

4. Agricultural Assistant Tool

Technologies: Python, Random Forest, Keras (CNN), Tkinter, NLTK

- Recommended crops based on soil parameters using a trained Random Forest model.
- Detected plant diseases from leaf images via a CNN-based model trained on the PlantVillage dataset.
- Integrated a chatbot for real-time query handling using NLTK, covering crops, diseases, and schemes.

4. Fingerprint & Signature Recognition System

Technologies: Python, OpenCV, Tkinter

- Developed a biometric verification system using ORB feature matching for image-based identity authentication.
- Created a user-friendly GUI with mode switching (signature/fingerprint) and dynamic image comparison.
- Applied preprocessing (Gaussian blur, thresholding) to enhance fingerprint recognition accuracy.

Awards

Awarded 3rd Prize by Reena Mehta College on 6th September 2024 in the Model-Making Competition during the Tech Vision event for developing a Fingerprint and Signature Recognition System using Python and OpenCV.

CERTIFICATIONS

- **Python Basics** – Cambridge (via UniAthena)
- **SQL, Python, Data Analytics** – (OneRoadmap)
- **Data Mining Course** –(Simplilearn)
