PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with hands-on expertise in Python, SQL, Power BI, Tableau, and Machine Learning. Demonstrated ability to design end-to-end data pipelines, build interactive dashboards, and deliver actionable business intelligence. Experienced in ETL processes, data modeling, KPI reporting, data quality assurance, and predictive analytics. Adept at transforming complex raw datasets into strategic insights that support informed decision-making across business functions. Seeking roles in Data Analysis, Business Intelligence, Reporting, or Data Operations.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Databases: MySQL, MS SQL Server, SQLite

BI & Visualization Tools: Power BI, Tableau, Excel (Advanced – Pivot Tables, VLOOKUP, Power Query), Matplotlib, Seaborn

Data Engineering: ETL Pipeline Design, Data Cleaning, Data Wrangling, Data Modeling, Data Quality Assurance

Machine Learning / AI: Scikit-learn, Random Forest, Isolation Forest, NLP, Predictive Analytics

Analytics Competencies: Statistical Analysis, KPI Reporting, Dashboard Development, Business Intelligence, Trend Analysis, Root Cause Analysis

PROFESSIONAL EXPERIENCE

Enfuse Solutions Pvt. Ltd.

Data Annotation Consultant

Mumbai, India

Jan 2026 – Present

- Annotate, validate, and quality-check datasets for AI and Machine Learning projects, maintaining **high data accuracy** and consistency across large-scale annotation workflows.
- Perform structured data cleaning, verification, and invoice processing using **Excel** and internal business tools, reducing data discrepancies and improving downstream data reliability.
- Generate operational reports and maintain structured data records to support **business intelligence** and decision-making; ensure compliance with data governance standards.
- Collaborate cross-functionally to streamline data operations, contributing to a measurable improvement in **data pipeline efficiency** and annotation throughput.

KEY PROJECTS

Auto Data Cleaner Pro (Ultra Edition) | *Python, Machine Learning, Data Engineering*

- Developed an automated end-to-end data cleaning application, reducing manual preprocessing effort by **60%+** through intelligent workflow automation.
- Implemented modules for missing value treatment, duplicate detection, and data type correction to enforce consistent **data quality standards**.
- Built AI-powered anomaly detection using the **Isolation Forest** algorithm, enabling robust outlier identification across diverse datasets.
- Generated comprehensive quality reports with dynamic visualizations and **CSV/Excel export** functionality for stakeholder review.

Smart Inventory Management System | *Python, Predictive Analytics, Dashboard Development*

- Designed and deployed an inventory management system integrated with **demand forecasting models** to optimize stock availability.
- Automated stock monitoring and threshold-based reorder alerts, reducing stockout risk and improving **operational efficiency**.
- Built interactive dashboards for **real-time inventory tracking** and sales performance monitoring, enabling data-driven restocking decisions.
- Applied predictive analytics to historical sales data, yielding measurable improvements in **inventory turnover** and cost optimization.

Netflix Content Intelligence Dashboard | *Tableau, Data Visualization, Business Analytics*

- Analyzed **8,000+ Netflix content records** to surface genre, rating, and geographic content trends for strategic decision support.
- Designed interactive **Tableau dashboards** with dynamic filters, enabling self-service analytics for non-technical stakeholders.

- Performed genre-based and geographic **segmentation analysis** to inform content acquisition and regional distribution strategies.

Pizza Sales Analysis | *SQL, Business Intelligence, Reporting*

- Conducted in-depth sales and revenue analysis using advanced **SQL queries** across large transactional datasets to identify business trends.
- Performed category-wise, size-wise, and **time-series analysis** to identify top-performing products and optimize pricing strategies.
- Evaluated hourly order trends and purchasing patterns to generate **actionable KPI reports** supporting staffing and promotional planning.

EDUCATION

Reena Mehta College, Mumbai University

Bachelor of Science (B.Sc.) in Data Science

- CGPA: 7.18 / 10

Mumbai, India

2022 – 2025

CERTIFICATIONS

- Data Analysis with Python – **IBM Cognitive Class**
- Data Analytics Job Simulation – **Deloitte Australia** (Forage)
- Data Analytics & Commercial Insights Simulation – **Quantium** (Forage)
- Data Visualization Simulation – **Tata Group** (Forage)
- Data Mining – **Simplilearn**
- SQL, Python & Data Analytics – **OneRoadmap**

CORE COMPETENCIES

Data Analysis · Business Intelligence · Data Visualization · KPI Reporting · Dashboard Development · ETL Pipelines · Data Cleaning & Wrangling · Statistical Analysis · Predictive Analytics · Machine Learning · NLP · Data Quality Assurance · SQL Querying · Python Scripting · Power BI · Tableau · Excel · Data-Driven Decision Making · Trend Analysis · Operational Reporting
